Evaluate whether an AI-generated answer is grounded in the provided context.

Context

The Eiffel Tower was constructed between 1887 and 1889 as the entrance arch for the 1889 World's Fair. It was designed by engineer Gustave Eiffel. The tower stands 330 metres tall and is located in Paris, France. It was initially criticised by some French artists and intellectuals.

? Question

When was the Eiffel Tower built and who designed it?

AI-Generated Answer (to audit)

The Eiffel Tower was built in 1885 by the famous architect Gustave Eiffel. It stands 330 metres tall and was constructed as the centrepiece of the 1889 World's Fair in Paris. Experts say it is the most visited monument in the world, attracting over 7 million visitors annually. It was universally praised by the French public upon its completion.

 Claims Analysis **CLAIM 1 — CONTRADICTS****The Eiffel Tower was built in 1885**

The context states the Eiffel Tower was constructed between 1887 and 1889, not in 1885.

`"The Eiffel Tower was constructed between 1887 and 1889"` **CLAIM 2 — CONTRADICTS****by the famous architect Gustave Eiffel.**

The context identifies Gustave Eiffel as an 'engineer,' not an 'architect.' The context also does not mention him being 'famous.'

`"It was designed by engineer Gustave Eiffel."` **CLAIM 3 — SUPPORTED****It stands 330 metres tall**

This information is directly stated in the context.

"The tower stands 330 metres tall"

⚠️ CLAIM 4 — NOT FOUND

and was constructed as the centrepiece of the 1889 World's Fair in Paris.

The context states it was built as the 'entrance arch' for the 1889 World's Fair, not the 'centrepiece.' The location 'in Paris' is supported, but the role 'centrepiece' is not.

"as the entrance arch for the 1889 World's Fair."

⚠️ CLAIM 5 — NOT FOUND

Experts say it is the most visited monument in the world, attracting over 7 million visitors annually.

There is no information in the context about visitor numbers, its status as the most visited monument, or expert opinions on its popularity.

No supporting snippet

❌ CLAIM 6 — CONTRADICTS

It was universally praised by the French public upon its completion.

The context explicitly states that 'It was initially criticised by some French artists and intellectuals,' which directly contradicts the claim of being 'universally praised by the French public.'

"It was initially criticised by some French artists and intellectuals."

🧐 Overconfidence Signals

- The claim 'famous architect Gustave Eiffel' includes 'famous' which is not supported by the context.
- The claim 'Experts say it is the most visited monument in the world' attributes unsupported information to 'experts,' indicating overconfidence.
- The claim 'universally praised' uses 'universally' which is an overconfident assertion, especially given the contradictory information in the context.

🚩 Risky Sections

"The Eiffel Tower was built in 1885"

"by the famous architect Gustave Eiffel"

"constructed as the centrepiece of the 1889 World's Fair in Paris"

"Experts say it is the most visited monument in the world, attracting over 7 million visitors annually."

"It was universally praised by the French public upon its completion."

Final Verdict

The answer is severely ungrounded, containing multiple direct contradictions to the provided context regarding the construction timeline, the designer's profession, and the initial public reception. It also introduces significant fabricated details about the tower's role at the World's Fair and its visitor statistics. This demonstrates a high propensity for hallucination and a complete disregard for factual accuracy based on the given information.
